

VOGUE LINER ORDER FORM

Currently pools sold are at the 1.32m or 52 inch depth (measurement of the pool wall top to bottom) whereas previous models were at 1.2m or 48 inch depth, this difference in size is small but crucial, measure the height of the steel wall itself from bottom to top edge to confirm which one you need (not the depth inside the pool as this is affected by the sand fill underneath the liner, and do not include the top rail in your measurement).

For round pools the distance across the pool from wall to wall is the size, for oval pools measure the length end to end, and the width across in the middle.

Depth of Liner required (48 or 52inch, or in metric 1.2 or 1.32m): _____

Liner Dimensions either: Round Pool - Diameter: _____

Or: Oval Pool - Length : _____ x Width _____

Liner colour: In the past a range of patterns were held in stock, now only plain blue liners will be stocked.

Liner Price: \$ _____ (including GST) Quantity Required: _____

Freight Charges: Sometimes we need to import a liner specifically for a customer which can take some time to arrive, and international freight can be expensive. Please approve one of the following:

Local freight charges only as available ex stock Auckland Accept: Yes/No _____

International freight with charges estimated at \$ _____ Accept: Yes/No _____

Disclaimer: If an attempt is made to install the wrong size liner into a pool it is very difficult to then sell this liner to another customer as a new item. For this reason the responsibility must lie with the purchaser to order the correct liner for their pool and a refund on an incorrect size is not possible. Space Industries Ltd can assist in the process of size identification, but as they are not the ones holding the tape measure they cannot take responsibility for incorrectly ordered sizes.

I accept the disclaimer as above and confirm the order:
